

Data Portfolio Assessment

Organisations often operate across a complex mix of applications, integrations, data platforms, and reporting solutions. Without a clear understanding of the current landscape, it can be difficult to prioritise investment, reduce risk, and align technology capabilities with business objectives.

Adaptiv helps organisations assess their technology and data portfolio, identify opportunities for optimisation, and develop a practical roadmap that improves efficiency, reduces complexity, and supports future growth.

Why it matters

- ✗ Gain visibility across your technology landscape
- ✗ Identify duplication, risk, and capability gaps
- ✗ Prioritise future investments with confidence
- ✗ Create a roadmap for modernisation and growth
- ✗ Improve alignment between business and technology

What this enables:

01. Portfolio visibility

Understand applications, integrations, data platforms, and reporting capabilities across the organisation

02. Opportunity assessment

Identify opportunities to optimise platforms, reduce complexity, and improve operational efficiency

03. Risk identification

Highlight technology, governance, and operational risks across the portfolio

04. Strategic roadmap

Create a prioritised plan aligned to business goals, future initiatives, and investment priorities

Data Portfolio Assessment

Our approach

Discovery

We work with you to understand your current state, needs and datasets to identify gaps and opportunities for improvement.

Support

Our team of dedicated support engineers will look after the solution(s) we designed, implemented and deployed for you.

Strategy and design

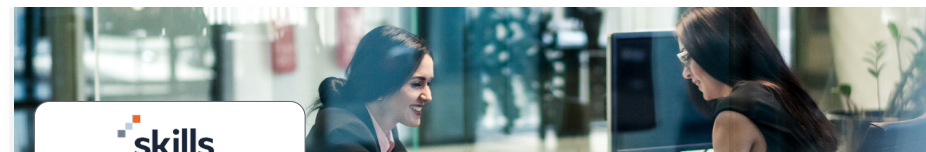

Our architects define the optimal strategy and create a technical blueprint aligned with your business goals.

Implement and deploy

Our developers will get the work done on time and on budget while following your internal coding standards and DevOps policies.

Technology partners

Using enterprise-leading technologies, Adaptiv's team of certified experts power your new and modern integration architecture.

Skills Group creates a roadmap for future data success

Industry: Education and training **Platform:** Databricks, Boomi

Skills Group needed greater visibility across its technology, integration, and data landscape to support reporting, planning, and future transformation initiatives.

Adaptiv assessed the current technology and data environment, identified opportunities for improvement, and helped define a roadmap for future technology, integration, and data investment.

Outcomes

- ✓ Improved visibility across organisational data
- ✓ Identified opportunities for data improvement
- ✓ Increased confidence in investment decisions
- ✓ Clear roadmap for future analytics initiatives
