

# Data maturity assessment

Organisations are under increasing pressure to become data-driven and realise value from analytics and AI initiatives. However, many lack a clear understanding of their current data capabilities, maturity, and readiness to support future innovation.

Adaptiv helps organisations assess their data maturity, identify capability gaps, and define a practical roadmap to strengthen data foundations, improve decision-making, and accelerate AI adoption

## Why it matters

- ✗ Understand current data capabilities and maturity
- ✗ Identify gaps and improvement opportunities
- ✗ Prioritise future investments with confidence
- ✗ Improve readiness for analytics and AI initiatives
- ✗ Create a roadmap for data-driven transformation

## What this enables:

### 01. Current-state assessment

Evaluate data capabilities, processes, governance, technology, and operating models

### 02. Capability improvement

Identify opportunities to strengthen data management, analytics, and reporting practices

### 03. AI readiness

Assess organisational readiness to support AI adoption and innovation

### 04. Strategic roadmap

Create a prioritised plan to improve data maturity and achieve business objectives

# Data maturity assessment

## Our approach

### Discovery

We work with you to understand your current state, needs and datasets to identify gaps and opportunities for improvement.

### Support

Our team of dedicated support engineers will look after the solution(s) we designed, implemented and deployed for you.

### Strategy and design

Our architects define the optimal strategy and create a technical blueprint aligned with your business goals.

### Implement and deploy

Our developers will get the work done on time and on budget while following your internal coding standards and DevOps policies.

## Technology partners

Using enterprise-leading technologies, Adaptiv's team of certified experts power your new and modern integration architecture.

## Skills Group connects the dots from data to development

**Industry:** Education and training **Platform:** Databricks, Boomi

Skills Group sought to improve its ability to leverage data across the organisation while preparing for future analytics and AI initiatives. Limited visibility into current capabilities made it difficult to prioritise investment and identify areas for improvement.

Adaptiv assessed the organisation's data maturity, identified capability gaps, and helped define a roadmap to strengthen data foundations and support future growth.

### Outcomes

- ✓ Improved understanding of current data capabilities
- ✓ Identified opportunities for maturity improvement
- ✓ Increased readiness for analytics and AI initiatives
- ✓ Clear roadmap for future investment and growth
