

Data platform modernisation

Many organisations rely on legacy data platforms that struggle to meet modern business demands. Siloed data, manual processes, and ageing technologies can limit agility, increase operational costs, and slow the adoption of analytics and AI.

Adaptiv helps organisations modernise their data platforms, creating scalable, cloud-ready foundations that improve performance, strengthen governance, and unlock greater value from data.

Why it matters

- ✗ Modernise legacy data platforms
- ✗ Improve scalability and performance
- ✗ Reduce operational complexity
- ✗ Strengthen governance and security
- ✗ Enable analytics and AI initiatives

What this enables:

01. Modern data foundations

Replace legacy technologies with scalable, cloud-ready platforms

02. Improved data accessibility

Enable faster, more reliable access to trusted data across the organisation

03. Operational efficiency

Reduce manual effort and simplify platform management

04. Analytics and AI readiness

Create a foundation for advanced analytics, reporting, and AI adoption

Data platform modernisation

Our approach

Discovery

We work with you to understand your current state, needs and datasets to identify gaps and opportunities for improvement.

Support

Our team of dedicated support engineers will look after the solution(s) we designed, implemented and deployed for you.

Strategy and design

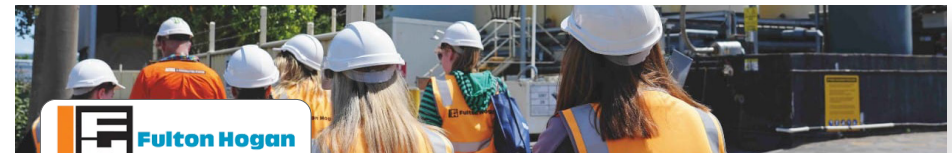

Our architects define the optimal strategy and create a technical blueprint aligned with your business goals.

Implement and deploy

Our developers will get the work done on time and on budget while following your internal coding standards and DevOps policies.

Technology partners

Using enterprise-leading technologies, Adaptiv's team of certified experts power your new and modern integration architecture.

Fulton Hogan modernises legacy platforms to support growth

Industry: Construction **Platform:** Microsoft Azure, Boomi

Fulton Hogan needed to modernise its integration landscape by replacing legacy technologies that increased complexity and cost. The organisation required a scalable platform capable of supporting future growth and evolving business requirements.

Adaptiv migrated Fulton Hogan's integrations from BizTalk to Boomi, modernising the platform architecture and creating a more agile, scalable integration environment.

Outcomes

- ✓ Modernised integration platform architecture
- ✓ Reduced operational complexity and cost
- ✓ Improved scalability and flexibility
- ✓ Strong foundation for future growth
